Jordan

Local and imported medicines need a serialised DataMatrix on the secondary pack. The JFDA deadline has been extended several times; the latest reported is 30 June 2025. Tracking through the supply chain is not mandatory.

THE REGIME

SYSTEM	JFDA medicines serialization
CODE ON THE PRODUCT	GS1 DataMatrix on secondary packaging: GTIN, batch, expiry, serial number
AGGREGATION	No.

STEPS FOR A SUPPLIER

- ☐ Register your products and GTINs in the national system: JFDA medicines serialization.
- ☐ Print a unique serialised code on every saleable pack.
- ☐ Verify every code on the line; aggregate into cases and pallets where required.
- ☐ Report production and shipments to the national system.

ON THE LINE, BEFORE THE FIRST SHIPMENT

- ☐ The data in the code is agreed: GTIN, serial number, batch, expiry date or crypto tail, as the rules for your product group require.
- ☐ A verifier has graded printed samples (ISO/IEC 15415 for 2D codes) before the first shipment.
- ☐ A camera after the printer reads every code at line speed, and packs with an unreadable code are rejected.
- ☐ Records show which code went on which pack, case and pallet, ready for the report to the system.

DATES AHEAD

No announced dates.
