Uzbekistan

Copies the Russian model and widens it every year. Almost 111,000 products are already marked. Vegetable oil is next in July 2027, with aggregation planned from January 2027, and jewellery could follow in 2029.

THE REGIME

SYSTEM	ASL BELGISI (operator CRPT Turon)
--------	-----------------------------------

CODE ON THE PRODUCT	DataMatrix with crypto protection
---------------------	-----------------------------------

AGGREGATION	Required for several groups.
-------------	------------------------------

STEPS FOR A SUPPLIER

- ☐ Get GS1 product numbers (GTIN) for every SKU and register with the national operator: ASL BELGISI.
- ☐ Order a code for every unit from the operator before production.
- ☐ Print and verify every code on the line; aggregate into cases and pallets where the product group requires it.
- ☐ Report the goods into circulation before they are sold.

ON THE LINE, BEFORE THE FIRST SHIPMENT

- ☐ The data in the code is agreed: GTIN, serial number, batch, expiry date or crypto tail, as the rules for your product group require.
- ☐ A verifier has graded printed samples (ISO/IEC 15415 for 2D codes) before the first shipment.
- ☐ A camera after the printer reads every code at line speed, and packs with an unreadable code are rejected.
- ☐ Records show which code went on which pack, case and pallet, ready for the report to the system.

DATES AHEAD

1 Jan 2027	Aggregation of codes into transport packs for vegetable oil (draft)
1 Jul 2027	Vegetable oil (draft resolution, public consultation October 2026)
1 Jan 2029	Jewellery for producers and importers, after a pilot to Dec 2027 (draft)
